The Executive Producer® — Project Video Logging

Item 1080 [TEP HD \(Bronze Edition\)](#) \$299.00

Log from P2, HD, FireWire (DV) or analog (BetaCam) video sources. Includes P2 card and SxS card offloading and MXF Repair Wizard. Custom user defined templates, timecode marking, DV or RS422 deck control, video frame "thumbnail" grabs, patented Auto Capture Technology™ (scene detection), storyboard printing, sorting, searching, cut & paste between files, HTML and batch list outputs for most NLEs. Imports Shot Lists, EDLs, and HD Log files. User Guide available in PDF. Download product only, web access necessary for activation. Windows XP/Vista 32.

Item 1081 [TEP HD \(Silver Edition\)](#) \$499.00

Bronze edition features plus patent pending TEP-Mail™, multiple file searching, spell checking and logging from media files (P2, MPEG, AVI, WM9). User Guide available in PDF. Download product only, web access necessary for activation. Windows XP/Vista 32.

Item 1082 [TEP HD \(Gold Edition\)](#) \$699.00

Adds Image Mine Database contribution and query to Silver Edition features plus seamless interfacing with Quantum A Series tape drives for P2 archiving. Includes MPEG-1 encoding, linking of existing media, and full tape digitizing for desktop sub-clipping. User Guide available in PDF. Download product only, web access necessary for activation. Windows XP/Vista 32.

ShotPut Products — Digital Card Offloading

Item 1112W [ShotPut Pro](#) \$89.00

Automated Offload application for Panasonic P2, AVCHD, Sony EX SxS, or RED ONE, CF, SD, and other digital media cards. Makes secure copies of the card's contents in up to three (3) locations. User configurable auto-naming of target folders with audible finish indication, erases contents of the card and renames it when finished. Single (manual) and Multiple (auto) modes with printable report log of file transfer activity. Convenient integration with your favorite external DVD or Blu-ray™ disc burning application. Download product only, web access required for activation. Windows XP/Vista 32.

Item 1111W [ShotPut EXpress](#) \$49.00

Automated Offload application for Sony EX SxS cards. Makes secure copies of the SxS card's video contents to up to three (3) locations. User configurable auto-naming of target folders with audible finish indication, erases video contents of the card and renames it when finished. Single (manual) and Multiple (auto) modes with printable report log of file transfer activity. Download product only, web access required for activation. Windows XP/Vista 32.

Item 1111RW [ShotPut RED Edition](#) \$49.00

Automated Offload application for RED ONE cards. Makes secure copies of the card's video contents to up to three (3) locations. User configurable auto-naming of target folders with audible finish indication, reformats cards when finished. Single (manual) and Multiple (auto) modes with printable report log of file transfer activity. Download product only, web access required for activation. Windows XP/Vista 32.

Item 1111PW [ShotPut P2 Edition](#) \$49.00

Automated Offload application for Panasonic P2 cards. Makes secure copies of the card's video contents to up to three (3) locations. User configurable auto-naming of target folders with audible finish indication, reformats cards when finished. Single (manual) and Multiple (auto) modes with printable report log of file transfer activity. Download product only, web access required for activation. Windows XP/Vista 32.

Quantum Tape Drives

Item 2068 [SDLT 600A Tabletop Drive](#) Email for a quote.

Item 2081 [LTO3 A Tabletop Drive](#) Email for a quote.

Item 2069 [Superloader 3A SDLT Drive](#) With 16 slots and barcode reader. Email for a quote.

Item 2084 [Superloader LTO3 A Drive](#) With 16 slots and barcode reader. Email for a quote.

Item 2070 [300 GB SDLT Tape](#) \$99.00 For use with SDLT 600A and Superloader 3A.

Item 2082 [400 GB Ultium 3 Tape](#) \$65.00 For use with LTO3 A and Superloader LTO3 A.

Quantum®

Timecode Break Detection

Item 1089 [TCDetective Pro](#) \$99.00

A simple yet powerful tool for finding timecode breaks on videotapes. TCDetective Pro finds breaks as small as 2 frames on DV tapes (via FireWire) or Beta-Cam tapes (via RS422). Windows XP/Vista 32 required for DV detection mode.

Image Mine® — Video Library

Item 2035 [Image Mine®](#) Email for a quote.

Turnkey system to catalog thumbnails and media from P2, HD, DV or analog video with descriptions into a relational database archive. MPEG-1 encoding, Panasonic DVCPROHD playback and linking to existing media. Includes on-site installation and training, Image Library database manager, single user TEP HD Gold, PCI video capture card and RS422 serial converter (SC/Win). Computer not included. Windows XP/Vista required.

Additional Modules for Image Mine®

Item 2051 [Image Track](#) Email for a quote.

Provides tracking of physical tapes, IN/OUT, user and inventory reports. Prints custom labels including barcode and your company logo. Unlimited password controlled LAN access. Windows XP/Vista required. (Optional Barcode scanner sold separately.) No annual fee. Image Mine Gold required.

Item 2052 [Image Browse Web](#) Email for a quote.

Add a web page to search Image Mine across an IntraNet or InterNet (from any browser or operating system.) Displays in HTML format and includes MPEG Clip playback. Windows web services required and ISP access to ODBC settings. Image Mine Gold required.

Image Track Hardware

Item 2004 [Barcode Scanner](#) \$399.00

Self contained USB barcode hand scanner for various style keyboards and barcode types. Users Guide included. Windows XP/Vista required. Compatible with Image Track software.

Controls & Timecode Reader

Item 2030 [SC/Win](#) \$39.99

Ten feet (10') integrated cable Serial Converter connects RS232 Win com port (DB9) to RS422 video deck remote port (DB9). Sony termination. Typical use BetaCam VTRs with TEP HD; or Windows NLEs.

Item 2037 [SC/DVCPro-W](#) \$29.99

Cable connects RS232 Win com port (DB9) to Panasonic (DVCPro) RS232 remote port (DB25). Ten feet (10'). Typical use Panasonic stock AJD-230 series decks with TEP HD.

Item 2021 [SC/1200-W](#) \$29.99

Cable connects RS232 Win com port(DB9) to Sony RS232 remote port (DB25). Ten feet (10'). Typical use UVW1200/1400 series decks with TEP HD.

Item 2054 [ShuttleXpress](#) \$59.99

Jog Shuttle Controller connect via USB to Macintosh or Windows computers. Typical use for easy jog and frequently used functions of HD Log, DV Log-X, TEP HD, or CrimeVision. 7 variable speeds and 5 programmable buttons. Software preferences included.

Item 2059 [USB/Serial Converter](#) \$99.00

Connect serial devices to the USB port on your PC. Provides one RS-232 DB9 serial port to connect a PC USB port to a deck or timecode reader. Typical use BetaCam VTRs with TEP HD or TCDetective. SC/Win cable required for RS422 control. Powered by the USB 1.1 or 2.0 port.

Item 2005 [LTC Reader-W](#) \$299.00

Windows Portable LTC reader. Connects RS232 Win com port (DB9) to RCA for timecode IN. Typical use field logging of timecode from the camera into TEP HD. 9V Alkaline battery recommended.

Item 2058 [USB LTC Reader](#) \$349.00

New, Portable LTC reader. Connects USB port to BNC for timecode IN. No batteries or serial converters required. TEP HD or HDLOG REQUIRED. Typical use field logging from the camera into TEP HD.

Video Capture

Item 2043 [PCMCIA FireWire Card](#) \$199.00

Add DV video feed-through, thumbnail capture and deck control to your notebook with this OHCI compliant PC Bus card. Typical use field logging with DV cameras and VTRs with TEP HD. Windows XP/Vista.

Item 2044 [PCI FireWire Card](#) \$199.00

Add FireWire (DV) feed-through and deck control to your desktop logging station with this OHCI compliant PCI card. Windows XP/Vista. Typical use studio logging with DV cameras and VTRs with TEP HD.

Item 2023 [PCI Analog Video Capture](#) \$299.00

Higher resolution video feed-through and capture with this NTSC & PAL compatible, full screen PCI half slot. Composite (RCA) and S-video input. Windows XP/Vista. Typical use is desktop logging with BetaCam VTRs and Camera Field Logging.

Item 2067 [USB Analog Video Capture](#) \$199.00

Add video feed-through and thumbnail capture via USB 2.0 port. NTSC & PAL compatible. Composite (RCA) and S-Video inputs. Windows XP/Vista. Typical use notebook logging with BetaCam VTRs and Camera Field Logging. 640x480 Max. Requires USB 2.0 Port.

Item 2063 [Analog to DV Converter](#) \$299.00

Portable analog video feed-through, thumbnail and digitizing via FireWire port. NTSC & PAL compatible. Composite (RCA), audio and S-Video inputs. Compact design is perfect for portability. May be used with NLEs. Note: Use serial control or LTC timecode reader to acquire timecode separately. Derives power from 6-pin FireWire port. Typical use portable or desktop analog digitizing with HD, BetaCam VTRs or cameras. No video drivers required. NOTE: Typical notebooks with 4 Pin FireWire ports require Item 2071 Power supply.

Item 2080 [Analog to DV Converter](#) \$349.00

Same as Item 2063 Analog to DV Converter with added video monitor out capability. NOTE: Typical notebooks with 4 Pin FireWire ports require Item 2071 Power supply.
