

PreRoll Post™

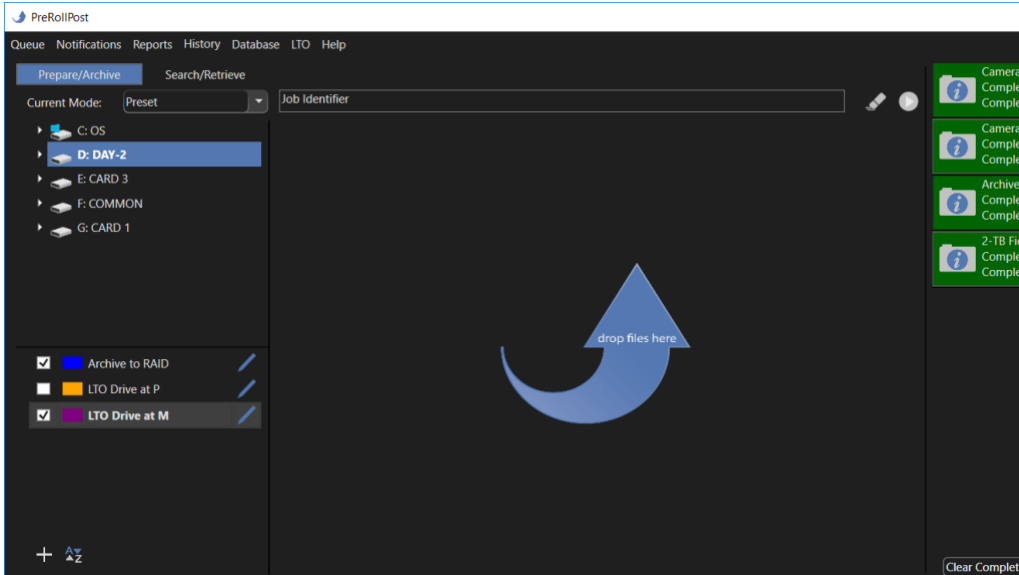

LTFS Archiving Application

Workflow experts, from acquisition to archive - we've got your back(up!)

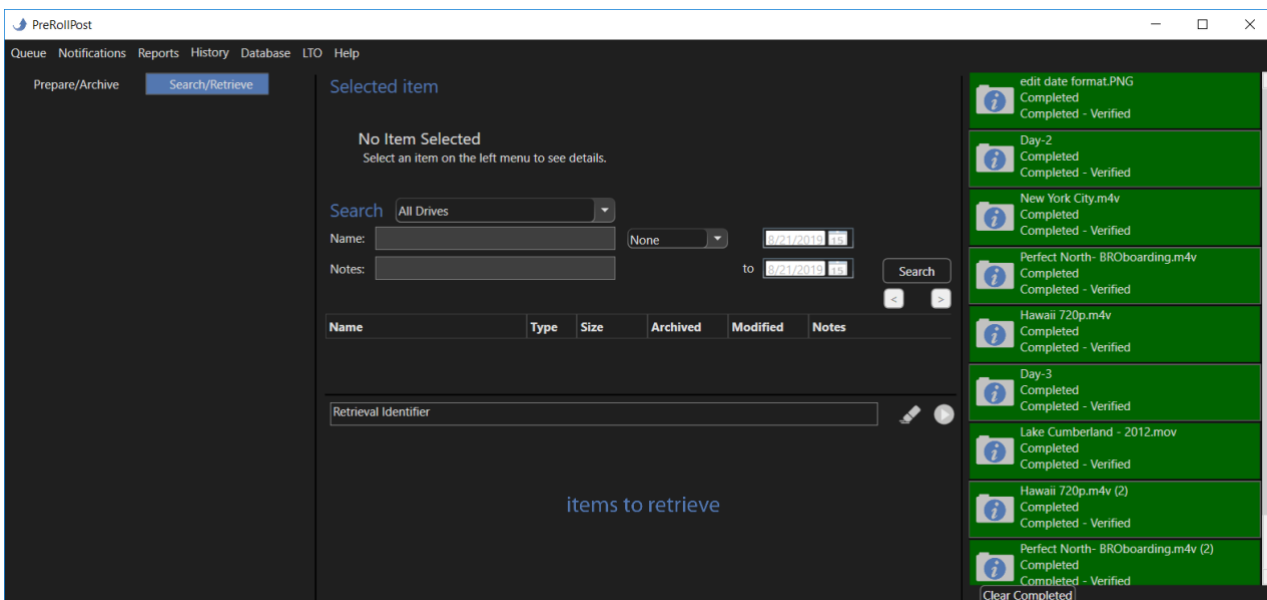

PreRoll Post is an LTFS archiving application for Windows users.

**Create secure archives of media with a searchable database for future retrieval.
Multiple verification options offer different security and speed preferences.**

- PreRoll Post is optimized for video files but can be used to archive any file type
- Drag and drop items into the queue
- Email and text notifications
- Multiple naming options for archives and tapes
- Mount, format and unmount LTO tapes easily

- Archive entire projects at once, including FCPX projects with symbolic links
- Control multiple LTO tape decks to copy between them or make duplicate archives
- Easily search and restore files from tape
