

# myLTO<sup>®</sup>

## Hassle-free LTO Back-up and Retrieval

### Presets

define your destinations, provide custom output folder naming, and select verification and report type(s)

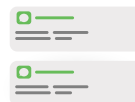

### myLTO Check-in

use the check-in tool to get help setting up the needed components to work with your LTO deck.

### PDF Reports

generate a shareable media focused PDF with up to 10 thumbnail images, custom logo, and metadata

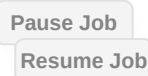

### Notifications

push, SMS, and email notifications so you can step away from your workstation and still stay connected

### ASC MHL

seal your files with the newest MHL version, allowing you to maintain your data's integrity

### Pause & Resume

pause a job at any point, pack up your gear and move locations, then finish it later with the click of a button

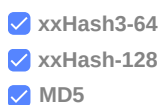

### Multiple Tape Recovery Options

choose an option that fits your needs, from partial or full recoveries to rolling back your tape.

### Job History & Reports

view metadata about past jobs and generate aggregate reports, which includes jobs from a selected range

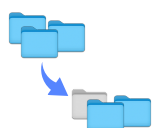

### Checksum Verification

choose from multiple different verification options such as xxHash algorithms, MD5, SHA and more

### Queue Automation

streamline your workflow by automatically adding items to the queue, starting jobs, & ejecting sources

### Duplicate Detection

speed up job time by ignoring duplicate items found on both the source(s) and destination(s).

### Ignore/Copy by File Extension

personalize your workflow further by choosing to ignore or only copy your defined file extensions.
